

Unique character and natural variation in stone

This product is made from genuine natural stone with brushed, uncoated surfaces that highlight the grain, texture, and natural variations. Each stone is unique, with differences in colour, pattern, and veining. Red streaks, calcite, and small cavities (sand pits) are natural features that give a vibrant, rustic character. Minor polishing marks may occur and further enhance the stone's unique character.

Example images showing natural colour variations, veining, and unique characteristics in the stone.
