

Congratulations on your new piece of furniture!

We hope it will become a cherished part of your home for many years to come.

For the furniture to look and function at its best, it is important that it is placed on a level and stable surface. When the furniture stands evenly, it creates the best conditions for doors and drawers to function as intended and achieve a neat, harmonious alignment.

Upon delivery, doors and drawers may appear slightly misaligned. This is completely normal and is often due to transportation and how the furniture is positioned in the room. With a few simple adjustments, you can easily fine-tune the hinges yourself so that the doors align neatly and open and close smoothly.

The furniture can also be mounted on the wall. In this case, the mounting rail is installed in the desired position. Please note that the choice of screws and fittings depends on the wall type (for example, drywall, concrete, or wood) and is therefore not included with the furniture, you will need to obtain these yourself.

Once the mounting rail is correctly installed, you can easily hang the furniture on it.

When everything is properly adjusted, the furniture will have a more balanced appearance and improved functionality in everyday use.
